The Journal of Educational Research is a well-known and respected periodical that reaches an international audience of educators and others concerned with cutting-edge theories and proposals. For more than 85 years, the journal has contributed to the advancement of educational practice in elementary and secondary schools by judicious study of the latest trends, examination of new procedures, evaluation of traditional practices, and replication of previous research for validation. The journal is an invaluable resource for teachers, counselors, supervisors, administrators, curriculum planners, and educational researchers as they consider the structure of tomorrow's curricula. Special issues examine major education issues in depth. Recent theme topics include methodology, motivation, and literacy.
